FIG. 1C

FIG 1D

FIG. 1E is a schematic diagram of a network architecture showing a central bus connecting multiple local servers and a regional server. The regional server is connected to the bus and provides profiles to the local servers. The local servers are connected to the bus and provide resources to the local servers. The local servers are connected to the bus and provide resources to the local servers.

The next few slides deal with the TEAM security of CLS.

Only Information Administrators can create, modify or

delete new teams. Once a team has been assigned to a

user , the user can assign resources to that particular team

and only those members will see the resource. We have

tried to depict a small scenario to give you a better feel

for TEAMS. An information administrator has been logged

on to show this illustration.

Continuous Learning System

Locate and View

- Display resource names.
- Search resource names (including categories).
- Save search as interest
- Choose and receive information resource

Provide or Distribute

- Add, edit or delete entries to the Resource Center.

Identify Interests

- Identify and save interests for notification.
- Review existing saved interests

Personal Information

- Review your personal profile.
- Change password.

Session Active.
Click on a button for instructions or double click to execute the button. You may also select the corresponding number to execute the desired function.

From screen
"Logon"

From screens
"Locate & View"
"Provide or Distribute"
"Identify Interests"
"Personal Information"

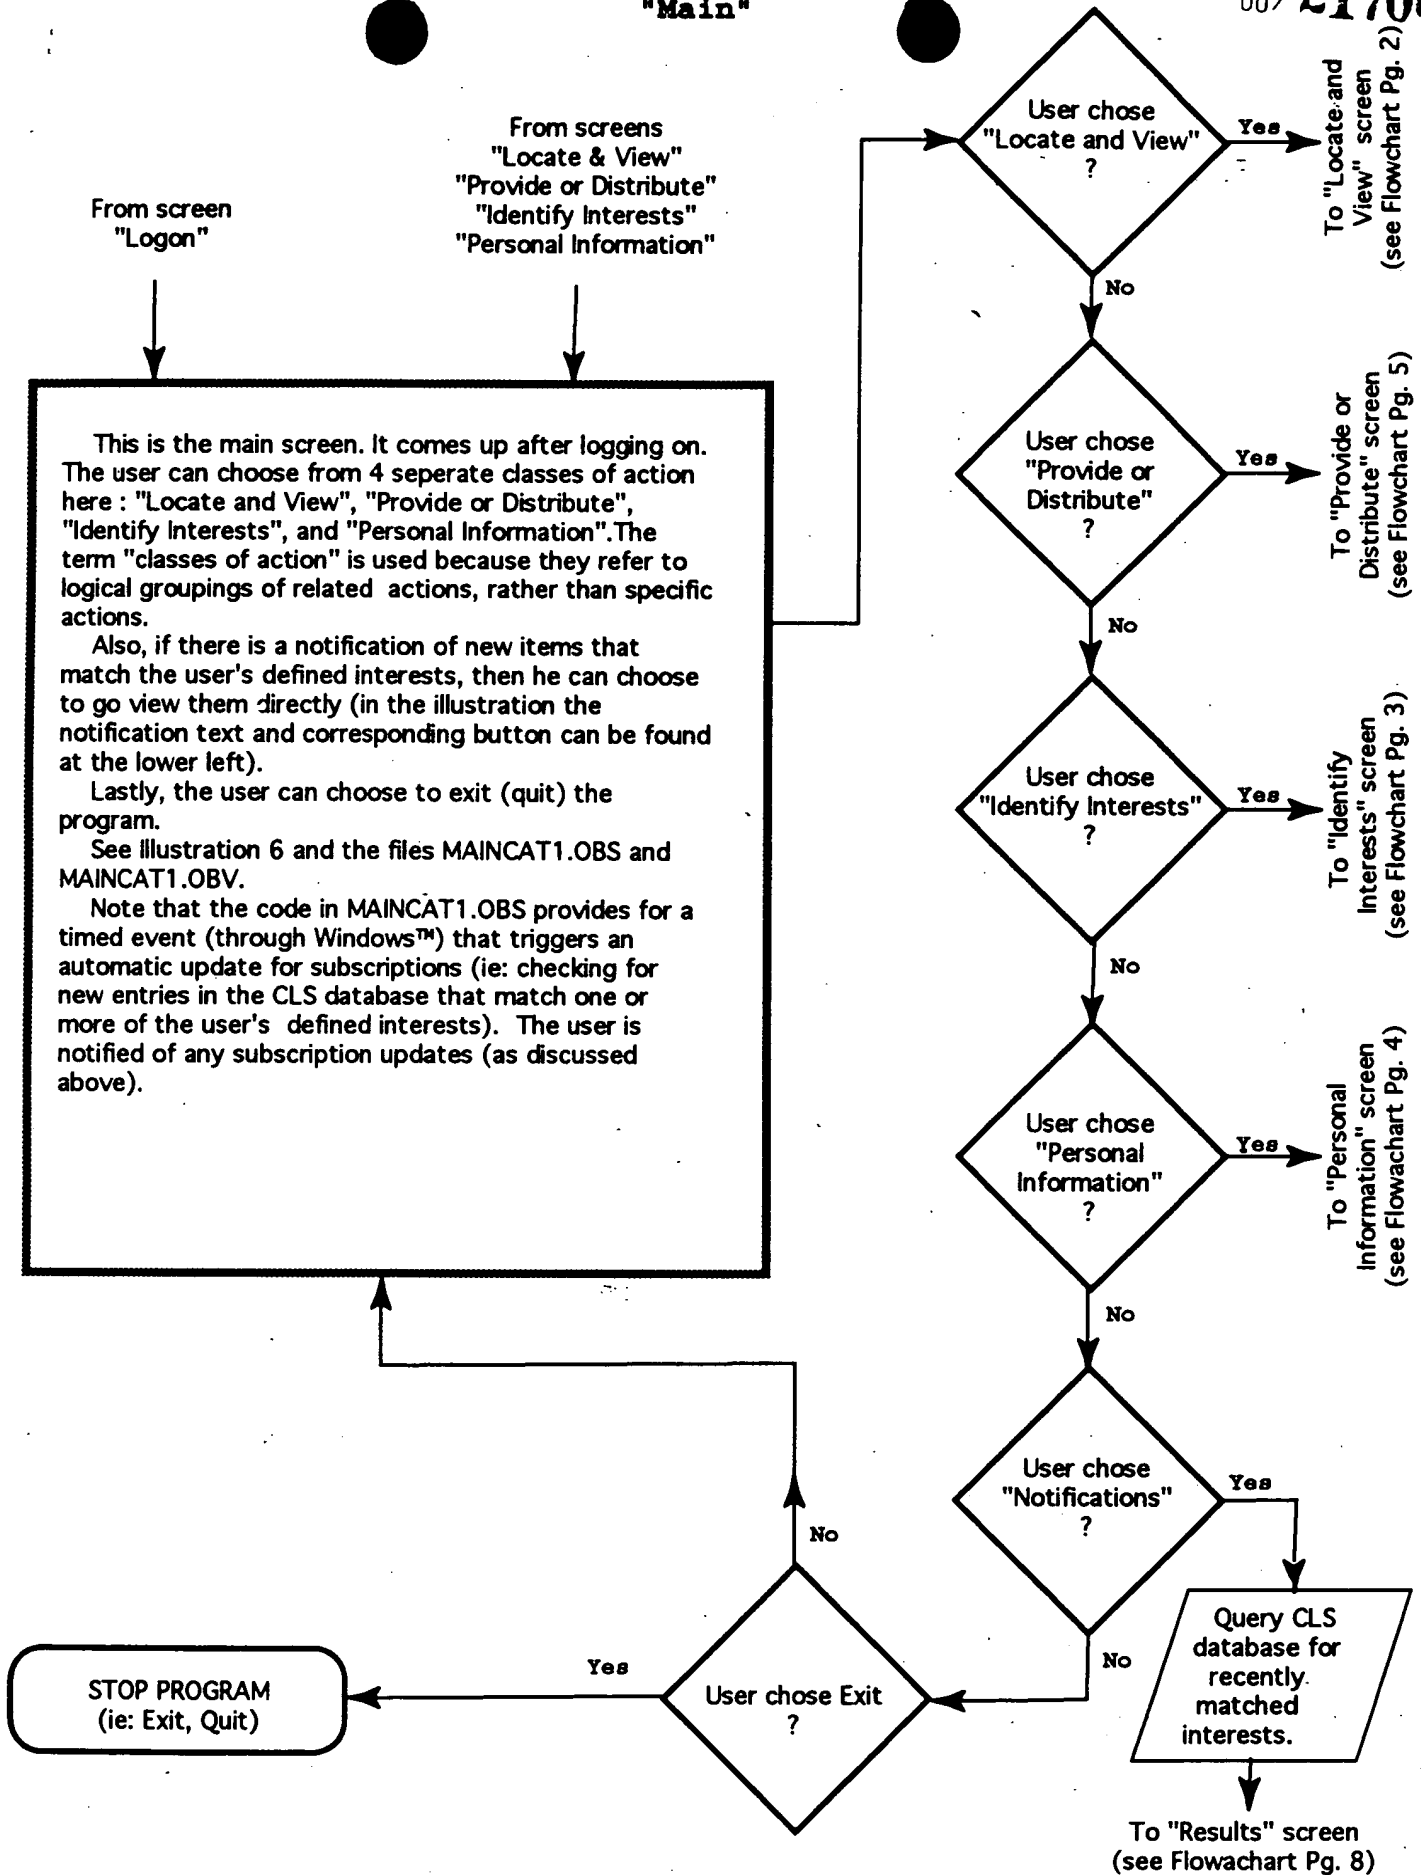

This is the main screen. It comes up after logging on. The user can choose from 4 separate classes of action here: "Locate and View", "Provide or Distribute", "Identify Interests", and "Personal Information". The term "classes of action" is used because they refer to logical groupings of related actions, rather than specific actions.

Also, if there is a notification of new items that match the user's defined interests, then he can choose to go view them directly (in the illustration the notification text and corresponding button can be found at the lower left).

Lastly, the user can choose to exit (quit) the program.

See Illustration 6 and the files MAINCAT1.OBS and MAINCAT1.OBV.

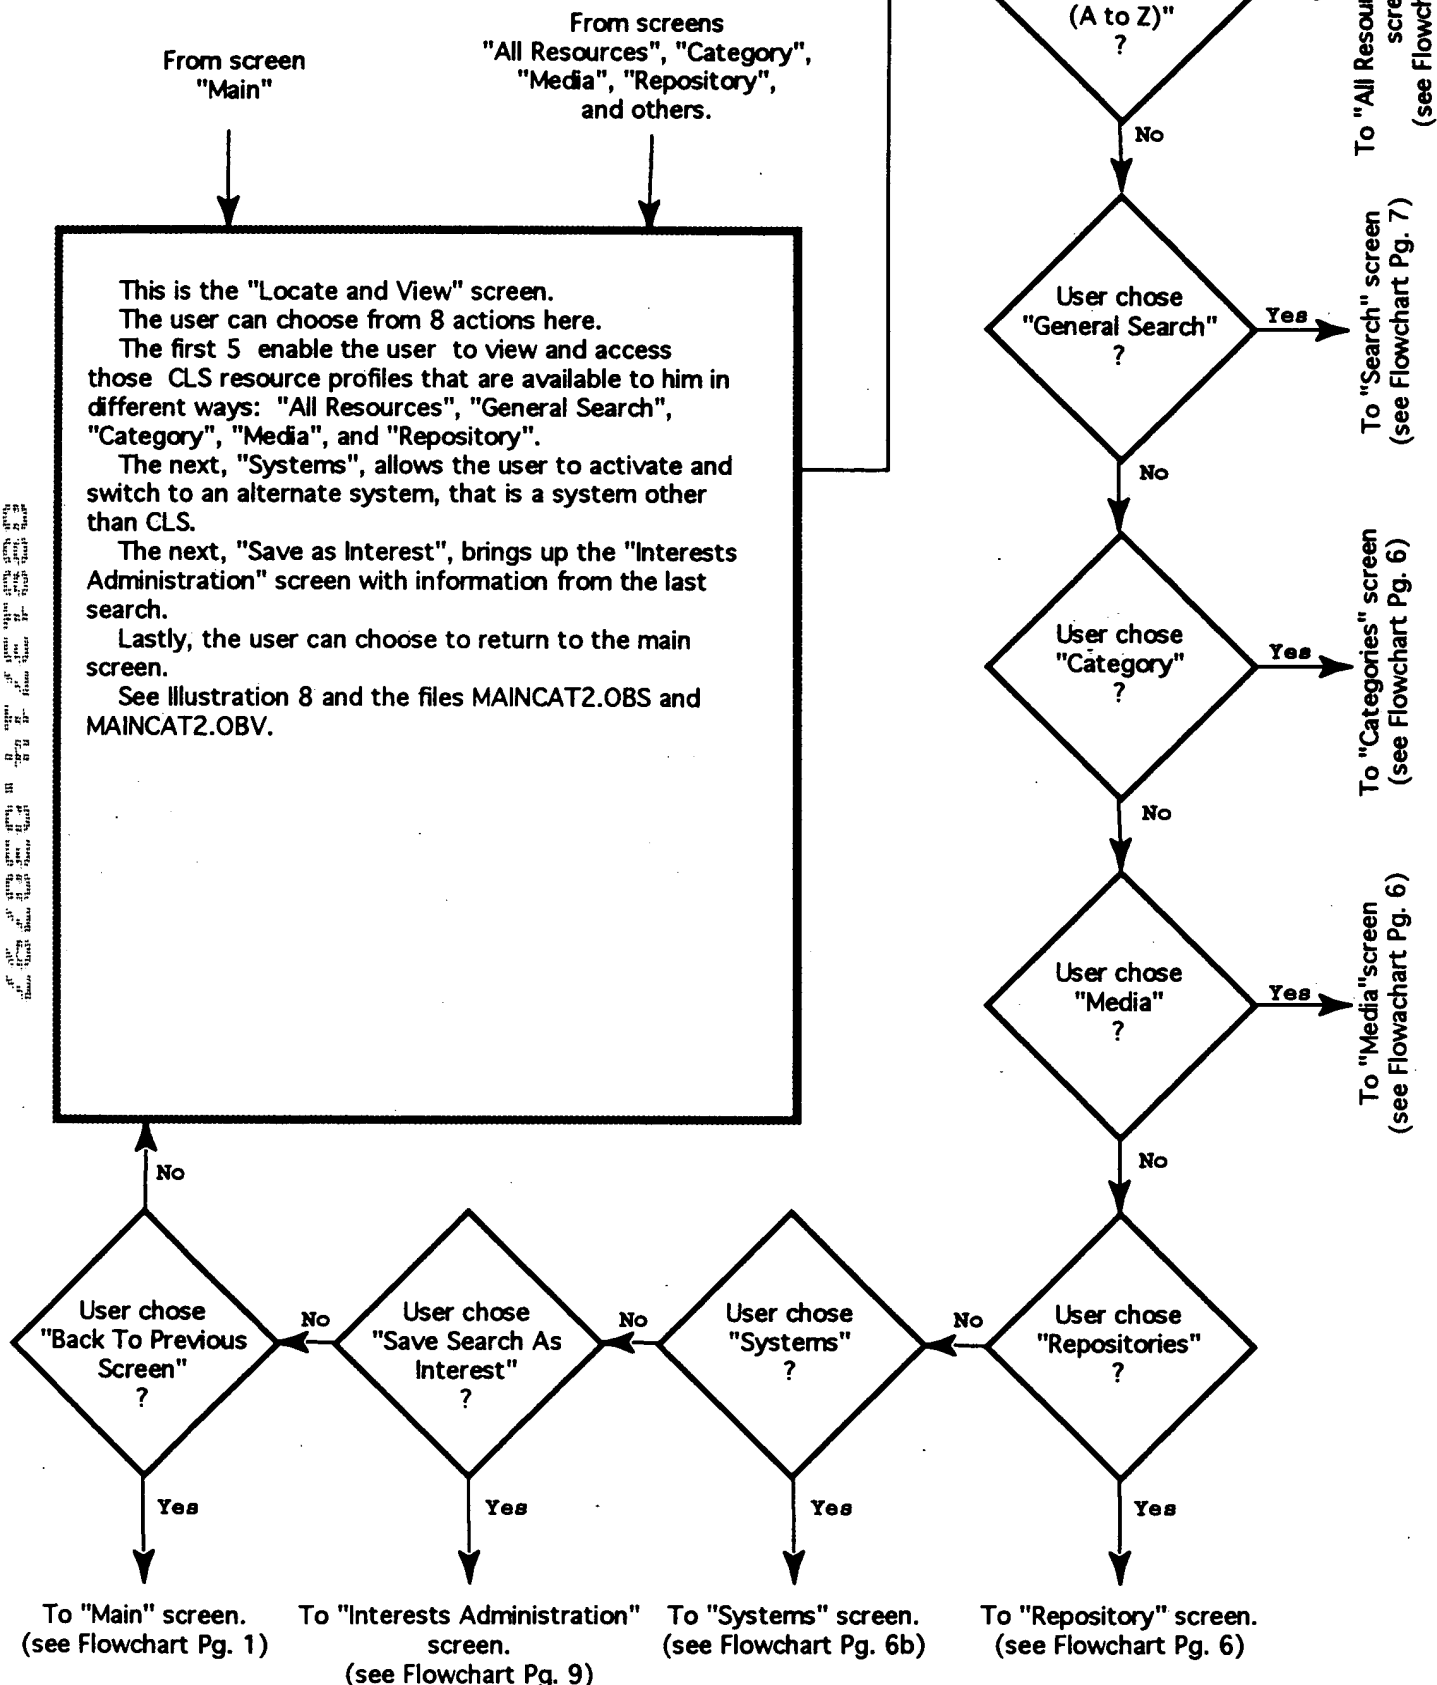

Note that the code in MAINCAT1.OBS provides for a timed event (through Windows™) that triggers an automatic update for subscriptions (ie: checking for new entries in the CLS database that match one or more of the user's defined interests). The user is notified of any subscription updates (as discussed above).

To "Results" screen
(see Flowchart Pg. 8)

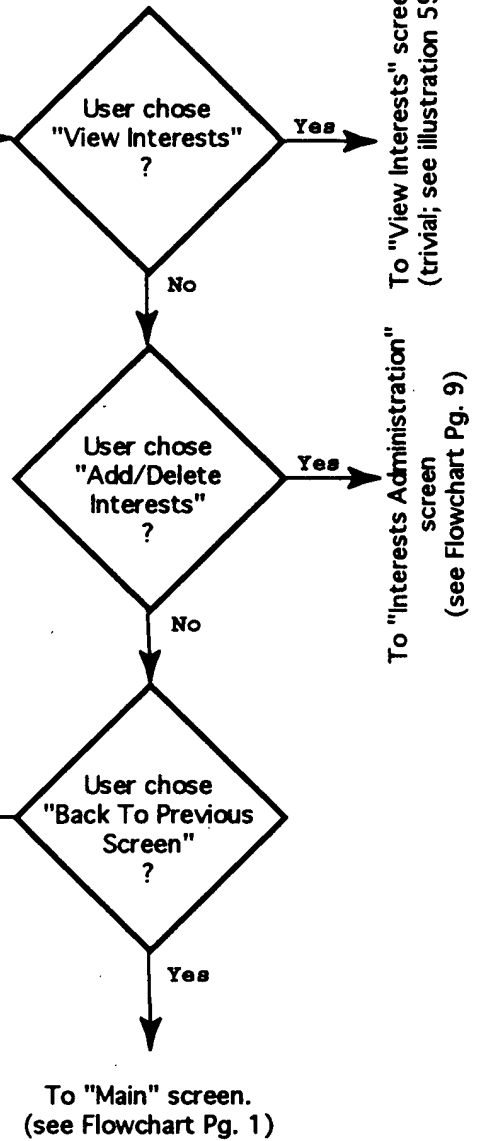

"Locate and View"

08/217065
\$13712

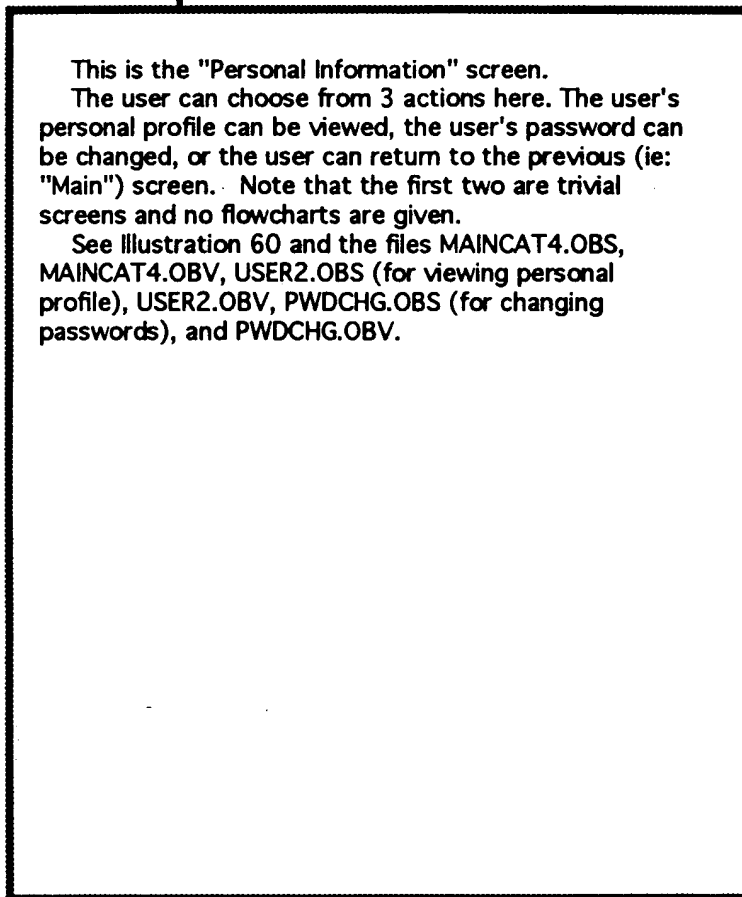

From screen
"Main"

This is the "Identify Interests" screen.
The user can choose from 3 actions here.
The user's interests can be viewed all at once, or
they can be added, deleted or modified one at a time.
Again, the user can choose to leave the view mode
and return to the previous screen.
See Illustration 56 and the files MAINCAT3.OBS and
MAINCAT3.OBV.

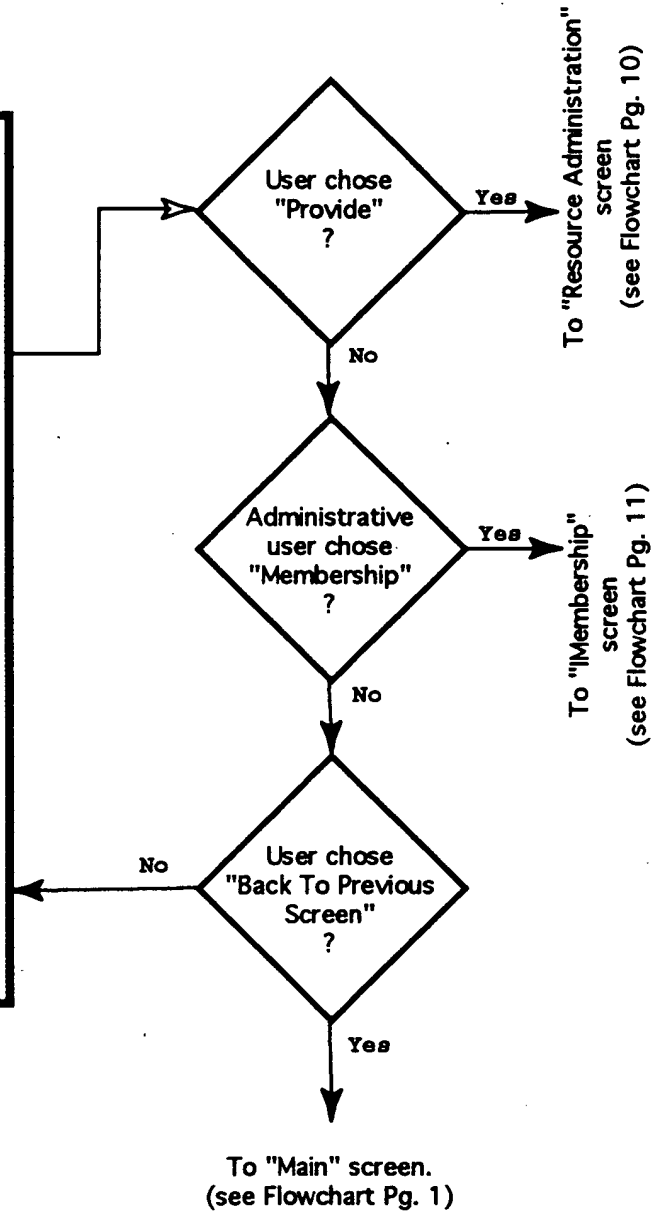

From screen
"Main"

From screen
"Main"

This is the "Provide or Distribute" screen.
The general (ie: non-administrative) user can choose from 2 actions here. He can decide to provide resource profiles, or he can return to the previous (Main) screen. Administrative users have the additional ability to edit CLS membership.
See Illustrations 40 (std. vers.) and 67 (admin. vers.) and the files MAINCAT5.OBS, MAINCAT5.OBV.

From screen
"Locate and View"
(see Flowchart Pg. 2)

Query database for list of items
appropriate to screen (all resources by
title, all categories, media types, or
repositories).

This screen, with only minor variations, takes care of 4 of the 5 ways to view available CLS profiles. Since the screens share almost identical logic and visuals there is only one flowchart.

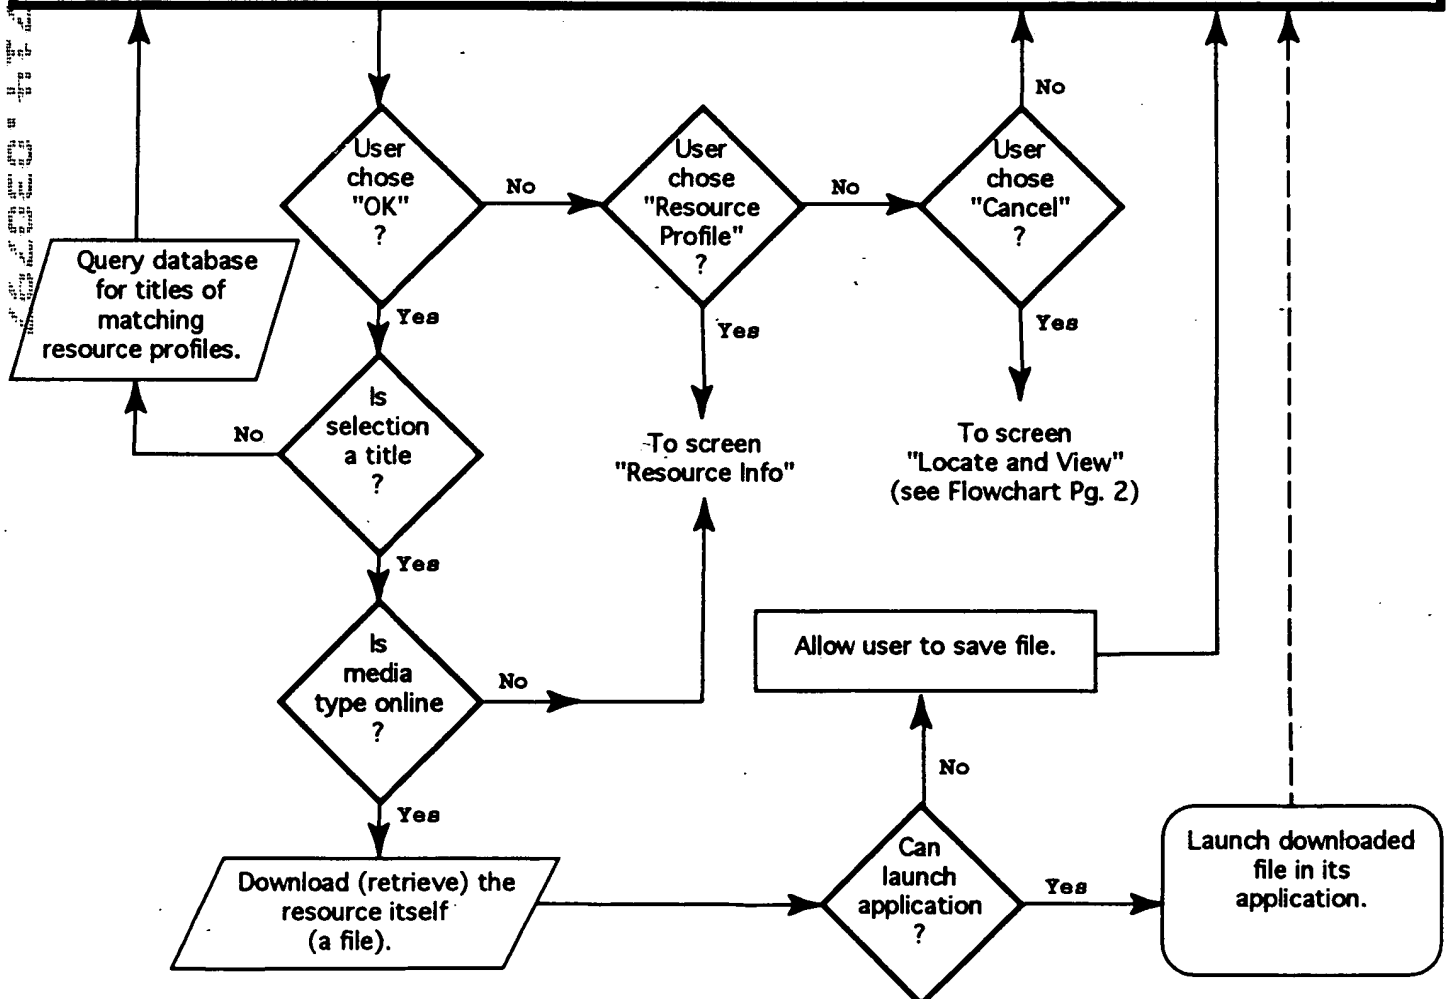

Resource profiles contain many items of information (see illustration 41), some of these are critical and are required (ie: if they are not provided, then the profile will not be accepted).

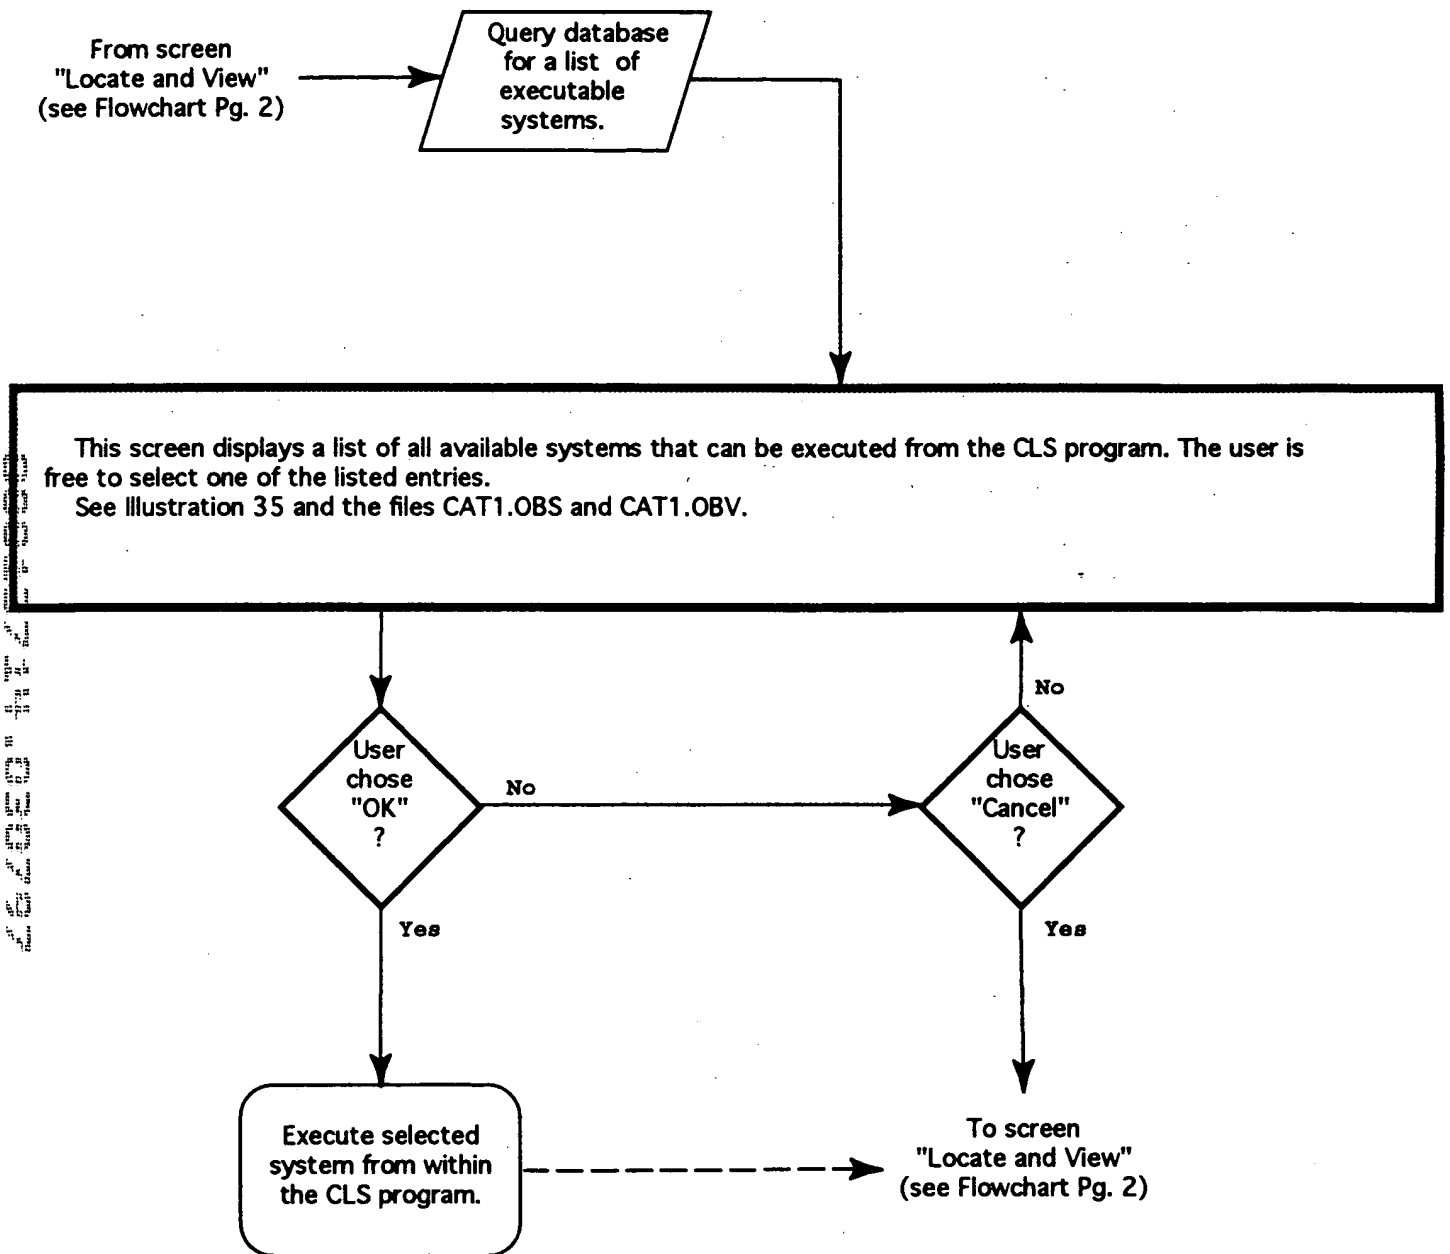

The resource title, information category, media type, and repository (an extra label) are required and form the basis for the variations in this screen. The basic idea is to display a list of all the possible values for one of these key fields, from which the user selects one, then all available profiles with matching values in that field can be made accessible using this same screen and displaying their titles.

Specifically, the "Media" screen displays a list of all available media types, the "Category" screen a list of all available categories, "Repositories" a list of all available repositories, and "All Resources (A to Z)" a list of all available titles. The user is free to select one of the listed entries. Then a list of all titles which have a matching entry in that key field are displayed. Thereafter, selecting a title initiates a download (retrieval) of the file or its profile.

"All Resources (A to Z)" is a special case. A selection is a resource title - which fully specifies a unique resource - so choosing "OK" will directly attempt to retrieve the resource itself, as opposed to listing all resource profiles with matching titles, since there would only be one.

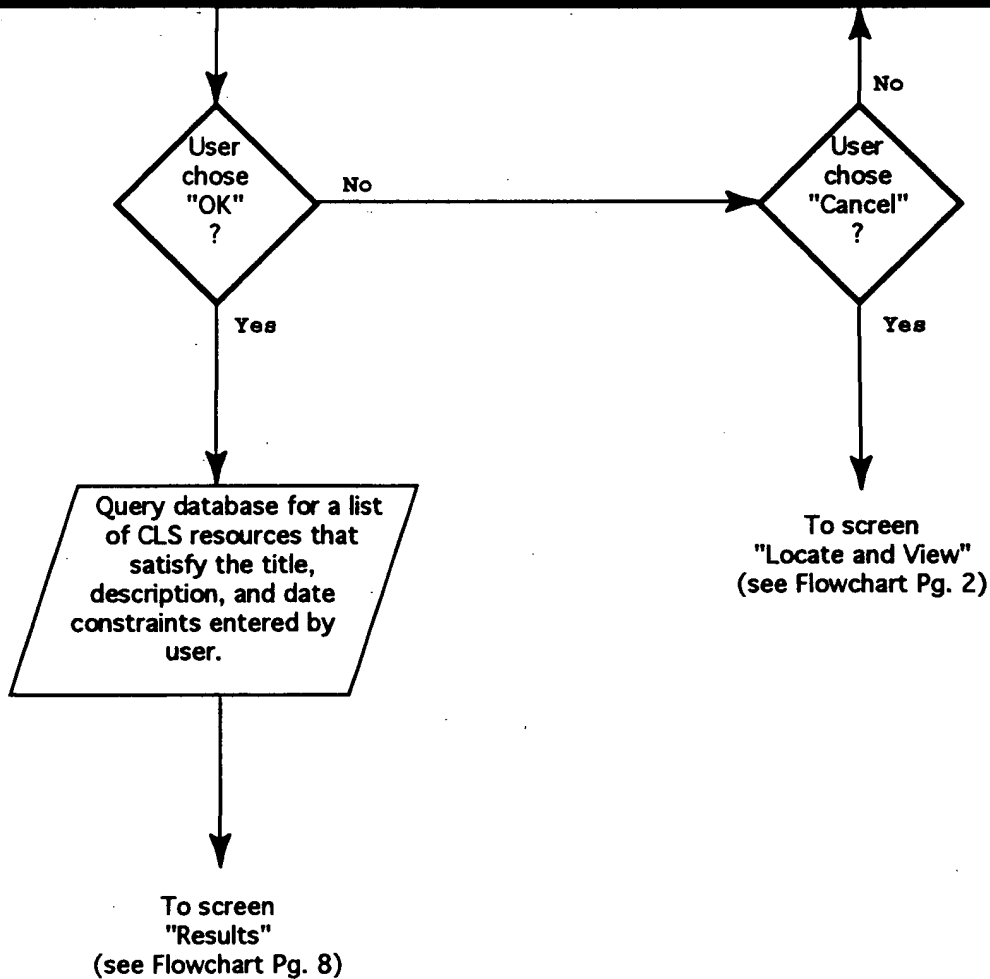

See Illustrations 19, 20, 27, 28, 30 & 31 and the files CAT1.OBS, CAT1.OBV, and RESULTS.OBS (esp. the subroutine "cataloginfo").

From screen
"Locate and View"
(see Flowchart Pg. 2)

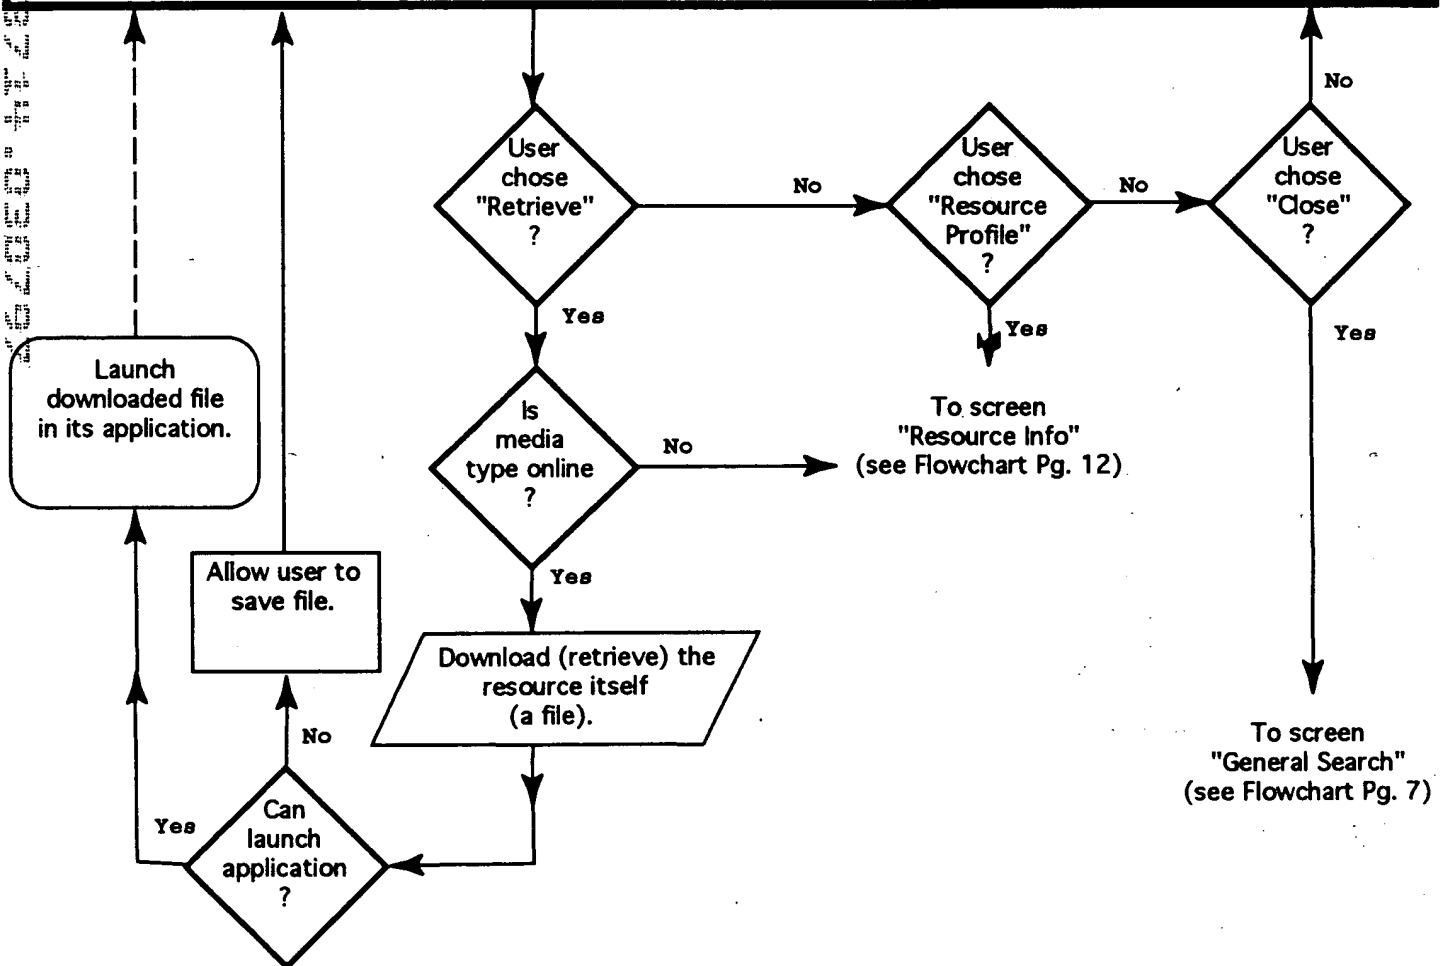

This screen manages user-entry of logical search criteria for the title, description, and date. These are used to find CLS resources whose own title, description, and date match. See Illustration 16 and the files SRCHNEW.OBS and SRCHNEW.OBV.

From screen
"General Search"
(see Flowchart Pg. 7)

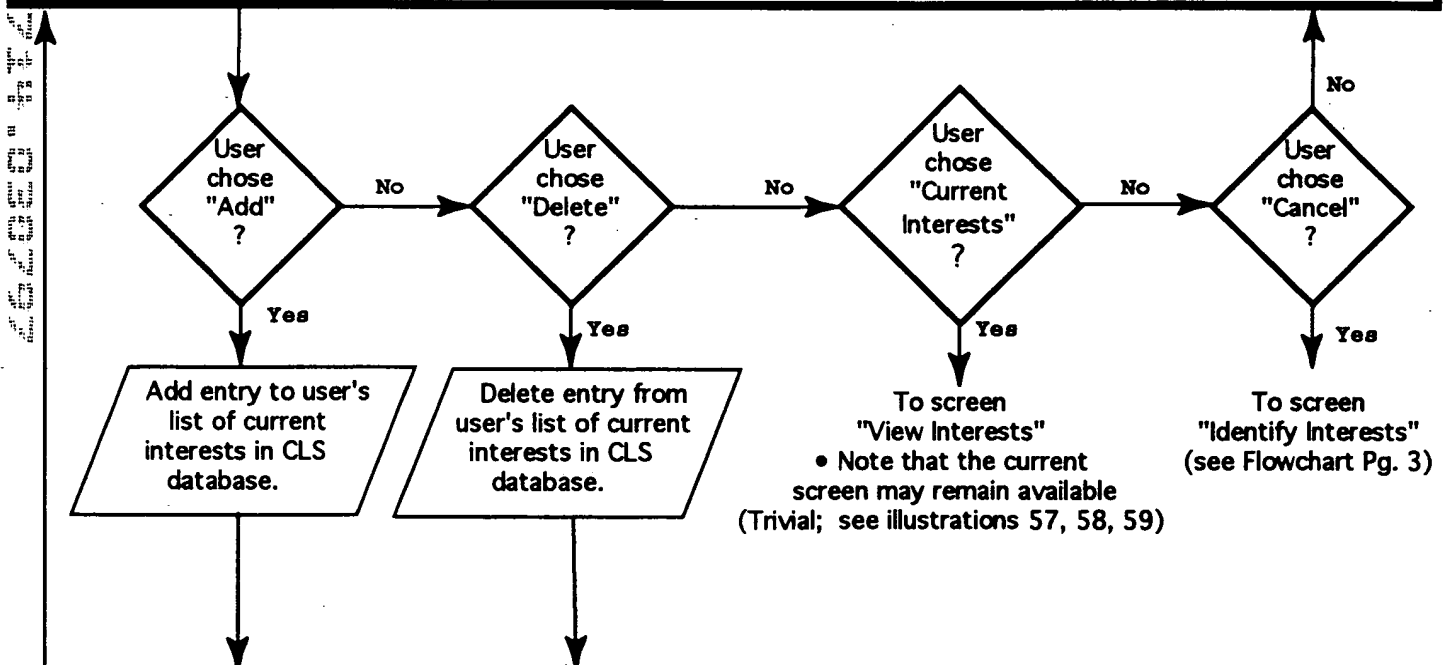

This screen displays a list of resources returned from a query of the CLS database. The user can select a CLS resource from the list and then download it or get its resource profile. Retrieving (ie: downloading) the file will automatically be followed by a launch of the program corresponding to the file, if possible, otherwise CLS will offer the user an opportunity to save the file for future reference.

See Illustrations 11 and the files RESULTS.OBV and RESULTS.OBS (esp. the subroutine "cataloginfo()").

From screen
"Identify Interests"
(see Flowchart Pg. 3)

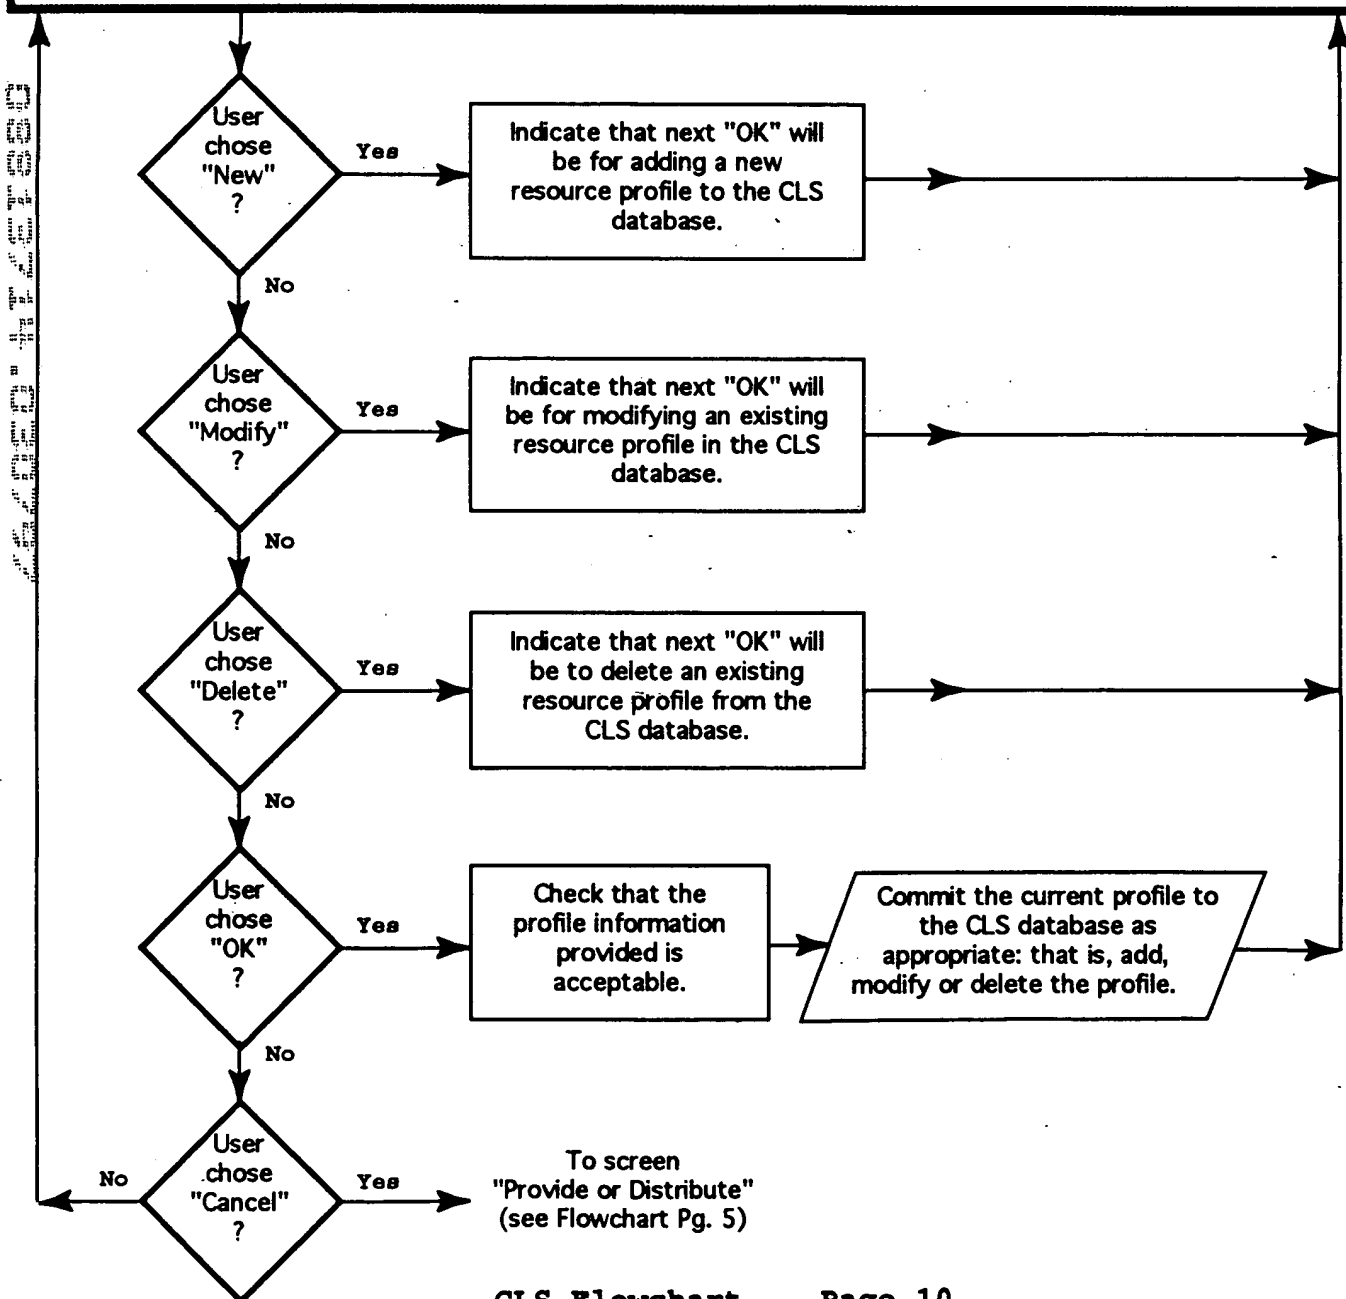

This screen allows the user to add and delete interests from the list of current interests (see illustration 59). An interest is a single line of logical search criteria for resource titles. When used for a query it will return exactly those CLS resources whose title matches the criteria. (Compare with the "General Search" screen on Pg. 7)
The list of current interests is maintained in the CLS database.
See illustration 59 and the files PROFILE1.OBV and PROFILE.OBS.

From screen
"Provide or Distribute"
(see Flowchart Pg. 5)

This screen allows the user to add, delete and modify resource profiles from the CLS database.
Note that the actual resources themselves are the responsibility of the person providing the resource. In particular, if a resource is "online", then it is his responsibility to maintain a copy of the resource at the location indicated in the profile (ie: the "information filename" includes the directory path locating the file on the network).

See Illustration 41 and the files CATADMIN.OBV and CATADMIN.OBS.

From screen
"Provide or Distribute"
(see Flowchart Pg. 5)

This screen allows the administrative users to add, delete and modify members (ie: personal profiles) from the CLS network. This controls who can log on to the CLS network.. Note that this screen is only available to qualified users (eg: the CLS Administrator).

This screen also provides access to the "User Administrator" and "Teams" screens.

... Flowchart details are not provided. ...

See Illustrations 68 through 75. The files MEMBERSHIP.OBV and MEMBERSHIP.OBS are not included. However, see USERADM.OBS and USERADM.OBV for the "User Administration" screen.

From screen
"Results"
(see Flowchart Pg. 5)
also "All Resources", "Category",
"Media" and "Repository"

This screen displays the key information about a CLS resource profile, and supplemental information about the contact (eg: E-Mail address and FAX number). It also allows the user to automatically forward an E-Mail or FAX request for more information about a resource, which is especially useful when the resource has a media type other than "online". Finally, if the media type of the resource is "online", then the resource can be retrieved directly (ie: downloaded) and launched in its native application (as can also be done from the "Results" screen). See Illustration 52 and the files CATDBF.OBV and CATDBF.OBS.
